

Comparison with other 360°cameras

【Normal Fish-eye lens camera】
3M pixel

Optical axis horizontal
View angle 180°

【OPT Fring Priority lens】
3M pixel

【OPT Ultra high resolution lens】
12M pixel

Optical axis vertical
View angle 360°

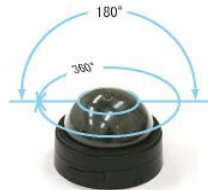

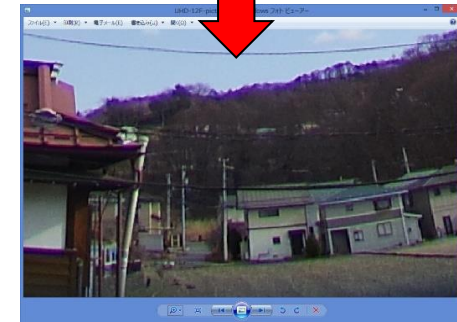

Image height is compressed in the fringe area.

Even with our FRIP lens, the image at the fringe area is not sufficiently clear.

Very clear at 100m in all 360° directions.
